

HF1801 PET ICU. INCUBATOR

have built-in humidifier. Now the humidity could be increased to 85RH (at 38 Celsius Degrees), which is required by many exotic species. (With an external humidifier).

Biomedical engineering research shows: when the atomized particles are about 10 microns, medicines can only deposit in the mouth and throat, when the atomized particles are about 3-6 microns, medicines can enter into the bronchus, and when the atomized particles are less than 2 microns, medicines can enter into the finest bronchus and alveoli. UC-1801 has a built-in nebulizer, it can produce 0.5-4 micron atomized particles of medicine, making full use of the medicine.

HF-VT1400E Vet operation table

1. The C-arm operating table is composed of acrylic table top, lifting support and table base, equipped with surgical instrument plate and infusion frame;
2. The height of the operating table adopts electric control;
3. The front and back of the operating table can be tilted by 45° respectively, which is electrically operated and weighs 40kg on one side.
